

SALOMON

PROFESSIONALS 2026

what is our

MISSION

PROVIDE THE BEST OF INNOVATION AND PERFORMANCE OUTDOOR FOOTWEAR TO ADDRESS THE NEEDS OF CORE DIRECT ACTION UNITS AND PROFESSIONAL REQUIREMENTS OF NATO AND ALLIED COUNTRIES

what is our

VISION

BECOME THE #1 TACTICAL OUTDOOR BRAND OF CHOICE FOR SOF & DEDICATED DISTRIBUTION NETWORK

SALOMON FORCES RANGE

Soldiers and public safety professionals need dedicated equipment to operate in hostile environments – this starts with appropriate footwear. For the past 10 years the FORCES range of tactical and combat boots have been designed and developed with professional military, law enforcement and first responders in mind. In addition to year-round comfort, outstanding traction in changing terrain, footwear for armed forces and law enforcement professionals must be stable, durable and provide total weather protection to complete the mission. Salomon selects materials, features and construction methods to withstand the rigors of daily professional use and protection during extreme and extended use in severe wet weather.

TECHNOLOGIES

GORE-TEX FOOTWEAR

COMFORT AND PROTECTION

GORE-TEX® Footwear provides durable waterproofness and high breathability. This membrane enhances comfort keeping the user fully concentrated on their job with increased situational awareness.

GORE-TEX® Extended Comfort Footwear is non insulated for high heat loss. It is ideal for warm weather and combined outdoor/indoor activities. Includes the added protection of a waterproof GTX membrane for extended use in severe wet weather. Contains PFAS chemicals.

BENEFITS

- Durably waterproof: dry feet
- Highly breathable: sweat out fast
- Non insulated: high heat loss
- Extremely abrasion resistant lining: exceptionally durable
- Quick re-dry: fast re-use
- Protection against exposure to sewage and commonly occurring chemicals*

*in accordance with ISO 13994/ASTM F 903 , method C1; commonly occurring chemicals include AFF Fire-fighting foam (3%), sulphuric acid H₂SO₄ (37%) diesel and caustic soda NaOH (30%).

CONTAGRIP

GRIP TO WORK IN ALL CONDITIONS

Contagrip® is more than a sole. It's a system of rubber compound and lug geometry, expertly engineered to optimize grip for each operation, terrain, and weather condition. Wet, dry, loose, hard, or muddy, Contagrip® performs better so soldiers and law enforcement personnel can perform with confidence.

GRIP SYSTEM

Every Contagrip® sole is a unique blend of rubber compound and lug geometry, targeted to provide the right mix of durability, adhesion, friction, and traction for different applications. Each have 3 families of compound and geometry.

GEOMETRY

FRICTION FIRST

More contact with the ground for confidence on flat surfaces, wet or dry

MIXED

A balance of surface area and multi-directional lugs to provide friction and penetration

TRACTION FIRST

Deep lugs with large drainage channels to penetrate soft terrain and mud

COMPOUND

DURABILITY FIRST

Tough, long-lasting, ideal for rough surfaces or extra long wear

CONTAGRIP^{MD}

Each shoe undergoes intense lab and field testing, against the reference products in the market

EXTERNAL LAB - LYON

Grip on flat and heel position.
Between 20°C and 4°C.

INTERNAL FOOTWEAR LAB - ANNECY

Grip on marble.
Between 24°C and 4°C.

EXTERNAL FIELD TESTS - ANNECY

Grip on rocks, in mud
and on grass

CHASSIS TECHNOLOGIES

When you move while training or deployed on uneven, varying terrain, having a platform that provides stability and cushioning is critical. Salomon has developed different chassis constructions developed for different terrain and uses, ensuring stability, cushioning, and comfort, while letting you move dynamically.

3D CHASSIS

Stability & propulsion for mountain terrain

advancedchassis

AVAILABLE ON
ALL X ULTRA MODELS

FIT TECHNOLOGIES

When military personnel train and deploy, their feet become flatter and wider the longer they stay out in the field. Combine that with the blisters, calluses and bunions that develop over many miles of training, and it's no surprise that proper fit is universally listed as the most important benefit of a tactical shoe.

QUICKLACE™

Easy-on, easy-off system for a secure and customized fit.

SENSIFIT™

Wraps the foot from the midsole to the lace system, providing a stable and precise fit.

TECHNICAL GLOSSARY

SOLE

	Every Contagrip® sole is a unique blend of rubber compound and lug geometry, targeted to provide the right mix of durability, adhesion, friction, and traction for different applications.
	A high performance EVA foam that provides shock attenuation

CHASSIS

	A stable chassis construction that harnesses two different midsole components to provide maximum foot control and active comfort
	A low-profile Advanced Chassis, placed between the outsole and midsole, maximizes security, motion control, energy management and push-through protection for a precise, stable and responsive ride.
	A lightweight Advanced Chassis, placed between the outsole and midsole, maximized motion control, energy management and push-through protection for an efficient, stable and responsive ride
	activeCHASSIS Definition: A chassis for increased guidance, uncompromised agility and fluid freedom of movement.

UPPER

	SensiFit cradles the foot from the midsole to the lacing system, providing a secure, snug and virtually customized fit all around the foot
	Leather
	Fabrics are tested against quality standards that are based on scientifically determined metrics that characterize both shaping performance and comfort.

WEATHER PROTECTION

	GORE-TEX Footwear provides durable waterproofness and high breathability. This membrane enhances comfort keeping the user fully concentrated on their job with increased situational awareness. GORE-TEX Extended Comfort Footwear is non insulated for high heat loss. It is ideal for warm weather and combined outdoor/indoor activities. Includes the added protection of a waterproof GTX membrane for extended use in severe wet weather.
	Waterproof weather protection for active hikers who need a flexible, lightweight waterproof bootie construction.
	Higher performance insulation with less weight and less bulk. Aerothrm® is a high performance technology that resists compression and keeps feet warm up to -40°C / -40°F
	Salomon's own 3-layer waterproof laminate. Made with a PFC-free membrane sandwiched between 100% recycled fabric and nylon backing.
	Advanced cold-weather insulation that provides an excellent weight-to-warmth ratio with small air pockets between the fiber balls. Made from 70% recycled polyester.

FIT

	Ortholite® insoles provide step-in comfort and enhanced durability, breathability, moisture and odor control using a combination of special PU and rubber
	A locking eyelet between the forefoot and ankle eyelets that locks the laces in place, enabling independent and precise adjustment
	Our patented Quicklace™ one-pull lacing system ensures a secure and customized fit. Easy-on, easy-off.
	Tuck the excess lace and the buckle up inside the pocket on the tongue of the shoe.

X ULTRA MID GTX FORCES

ASSAULT

Equally at home on low-vis operations and high tempo assaults this tactical boot combines the agility of a trail running shoe with the stability of a light hiker. Equipped with an Advanced Chassis providing lateral support and anti-puncture underfoot this boot is protective yet does not compromise freedom of movement. Includes the added protection of a waterproof Gore Tex membrane for extended use in severe wet weather.

AMPHIB ASSAULT

ASSAULT

For missions in and out water the FORCES AMPHIB ASSAULT is designed to be compatible with most combat swim fits and provides under foot protection from rocky shores and caving ladders. Non-absorbent upper materials, strategically placed mesh panels and drain holes ensure quick evacuation of water once on land.
